

## ***Adhering Carpet or Wood Sleepers to the Sealoflex CT System™:***

When adhering carpet or wood sleepers to a Sealoflex CT™ deck system, we recommend:

- AAT-290™ Exterior Adhesive ([www.aatglue.com](http://www.aatglue.com)) OR
- Turf Claw Adhesive ([www.engineeredSPORTfield.com](http://www.engineeredSPORTfield.com) and [www.TurfClaw.com](http://www.TurfClaw.com))

The adhesives are recommended because they are compatible with our CT™ products and will not cause damage to our CT™ products. However, it is the responsibility of the installer of any adhesive to verify the compatibility of the adhesive with the carpet. Sealoflex Inc. accepts no responsibility of the compatibility of any adhesive with any carpet.
