*Thirty years of
protecting the entire
building envelope*

Innovative waterproofing systems for WALLS

With 4 walls to every roof, SEALOFLEX wall waterproofing systems offer unparalleled opportunities to satisfy your customer.

For over 30 years Sealoflex has set the benchmark for waterproofing systems with complete solutions for the entire building envelope

SEALOFLEX wall waterproofing systems:

- ✓ Easy to apply, guarantee lower labor costs
- ✓ Highly flexible, virtually impossible to crack
- ✓ Safe: VOC compliant
- ✓ Leaves no gaps, eliminating air passage
- ✓ Wide range of colors and textures
- ✓ Suitable for use over all major substrates
- ✓ Algae, dirt and mildew resistant

Absolutely nothing gets past a Sealoflex wall system.

“I redid the wall, coated it with Sealcoat Elastic and that was the end of the leak”

—David Brennan, Home Builder

“When I use Coraflex, I am confident I have a complete waterproofing system that will stand the test of time.”

—Lenny Krzan, Contractor

“Our contractor customers really appreciate the reduced labor costs associated with Sealoflex Wall systems”

—Ralph Jewel, V.P.,
Integrated Roofing Systems, Inc.

Products:

Total system solutions with 3 specialized products that cover all applications.

Sealcoat Elastic™
A tough, highly flexible and decorative coating specially formulated to provide “crackbridging” of the substrate with excellent resistance to mildew and dirt pick up.

Sealclear™
Provides water repellency and prevents efflorescence for both new and existing concrete and masonry surfaces. This clear penetrant maintains the natural appearance of the original structure. Ideally suited for highly alkaline surfaces such as brick, concrete, textured finishes, limestone and natural and synthetic stone.

Coraflex™
Upgrade and transform an unattractive, plain wall into a beautifully enhanced surface. A decorative, flexible textured finish which provides waterproof “crackbridging” protection.
