

Envirocleanse

Biodegradeable Cleaner

Commercial Product Data Sheet

Description

Envirocleanse is a biobased cleaner designed to flush paint lines and clean spray guns, nozzles and other equipment.

Uses

Envirocleanse is an excellent cleaner for Sealoflex Enviroflex, CT coatings and other resins such as epoxy and polyurethane. It effectively cleans liquid coatings from paint lines, hoses, brushes and rollers. Envirocleanse can also be used to restore brushes and to help remove old paint on equipment. It outperforms naphtha, toluene and xylene solvents.

Advantages

- A pleasant citrus odor
- Safe, non-toxic and 100% biodegradeable solvent
- Made from renewable resources
- Contains no hazardous air pollutants
- Non-SARA 313 reportable

Instructions

- Works best when lines are flushed immediately after use
- Can be filtered or distilled and reused
- Metal parts can be soaked overnight for easier cleaning
- Cycle repeatedly through paint lines for deep cleaning

Precautions

- As with any solvent, wear proper safety equipment

Cleaning

Wash tools and equipment with water.

Envirocleanse

Physical and Mechanical Properties

Product Form	Mixture
Shelf Life and Storage Conditions	12 months if unopened & stored between 40°F & 104°F <i>DO NOT ALLOW TO FREEZE</i>
Flash Point	105°F
Evaporation Rate	Approximately 0.3
Packaging	5 gallon containers

Ed. June 2016
